

Draw the following angles using a protractor on a separate sheet of paper.

1. 43 degree angle
2. 116 degree angle
3. 135 degree angle
4. 20 degree angle
5. 165 degree angle

If you play golf, then you know the difference between a 3 iron and a 9 iron. Irons in the game of golf are numbered 1 to 10. The head of each is angled differently for different kinds of shots. The number 1 iron hits the ball farther and lower than a number 2, and so on. Use the table below to draw all the different golf club angles on the line segment below. Please use the 0 degree line as your starting point.

1 iron	15 degrees	6 iron	32 degrees
2 iron	18 degrees	7 iron	36 degrees
3 iron	21 degrees	8 iron	40 degrees
4 iron	25 degrees	9 iron	45 degrees
5 iron	28 degrees	Pitching wedge	50 degrees
