

## The Miracles Workers

Several world-famous experts have agreed to provide their services to this class. Their skills are so effective that they are considered miracle workers by people who used their services. You can be 100% sure that they can do what they say they will. However, their services are in such demand that you must choose only those 3 workers whose gifts you would like most to receive. You should also choose 3 workers who are least appealing to you – the ones whose services you don't think you (or other members of the class) will want or need.
