### Math Test Corrections

I believe we learn best from our mistakes. You have the opportunity to revisit the problems you missed on this test, correct them, and raise your grade all at the same time.

This helps focusing in on the concepts or types of problems you did not understand, as opposed to redoing correct problems that are already mastered. Our class policy is as follows:

- ⇒ You have one week from the time your test was returned to get your test corrections handed back in to me in order to earn a 70. During this time, you can get help from me, a friend, a sibling, a parent, the President...just get help if needed!!!
- ⇒ You redo **ONLY** the problems that you did not get correct.
- ⇒ To earn a 70% your corrected problems must be solved on a separate sheet of paper. You must also...
  1. Re-write the question.
  2. Answer the question, showing ALL work.
  3. Get the question right.
  4. Fold your correction page(s) around original test [make sure all original work is still included]. Then place these pages around the outside of the entire packet.
  5. Get a parent signature below.

Parent Signature \_\_\_\_\_

**DO NOT WRITE ANYTHING ON THE ORIGINAL TEST!**

Problem #	Original Answer	New Answer	Problem #	Original Answer	New Answer
