

How To Complete a Review for Mr. Mangham's Class

1. Pick up or print out a review.
2. Find a pencil. **Do all work AND corrections in pencil.**
3. Find a few sheets of notebook paper.
4. Solve each problem showing all your work on your notebook paper.
5. For each problem make sure to write the problem number next to it so Mr. Mangham can find your work.
6. Show your work the same way we did for all those problems in class.
7. "I don't know if I need to show work for a particular problem?" Show it.
8. I suggest you try to complete the review the first time **without any help.**
9. Make sure to write all your answers in the answer spaces on the review itself.
10. Once that is complete it is time to check your review.
11. Go to ManghamMath and pull up the answer key provided by Mr. Mangham.
12. As you check each problem write either a checkmark (correct) or circle the problem number (incorrect).
13. Once all problems have been checked, it is time to go back and correct the ones you missed.
14. **First draw a line under your last work and then label the next section "Corrections."**
15. As you are redoing the ones you missed **IN PENCIL** this would be a perfect time to ask questions of Mr. Mangham, on Edmodo, of your parents, of your tutor, etc.
16. On test day bring everything with you to class.
17. Write your name on the top where it says "Name" and fold all work inside of your review.
18. Place it in the correct bin in the back of the room anytime on test day.
19. Your review is now complete.
20. Smile.
